

Author Opinion Letter

Joanna

Many thanks for accepting our paper titled "Findings from a Neuroimaging & Early Diagnosis Service for Dementia in East Kent". I am a author of various scientific publications in various journals including in the British Medical Journal, however my experience with publishing in Neuropsychiatry (London) has been excellent. I am particularly impressed by the easy to use IT submission system which for me is a unique selling point for which I will make further submissions in the coming year. The admin staff especially Joanna kept in touch regularly regarding various corrections which were needed and this made the entire process very easy. I will

certainly recommend my colleagues to submit their scientific papers to Neuropsychiatry(London).

Dr M. Dalvi MBBS, MRCPsych, DPM (The Royal College of Surgeons in Ireland),D. Neuropsychiatry (University of Birmingham)
